01 ABOUT ME

Currently pursuing a career as a Back-end Software Developer, I'm very enthusiastic about my future and I look forward to learning more about my interests. My current interests are developing in Python and Golang and I have grown fond of Back-end Development ever since I began coding (8 years ago). I am open to all types of opportunities and challenges, knowing that I will persevere until I succeed, since I am driven by new challenges and the dopamine rush at the end of tasks.

02 WORK HISTORY

Mar 2022 — Present
Campinas

Python Developer at Gympass

Responsibilities:

- Transform business rules into automated code
- Automate processes using APIs and Selenium
- Work with the Salesforce API and Salesforce Object Query Language queries to retrieve data and update the Salesforce Database
- Assist executives in filling in the CRM

Achievements:

- Transform the teams' methodology to Agile Methodology, running the role of a SCRUM Master
- Implemented the tool Jira Software and Jira Service Management to track the teams' performance and organize the sprints
